# Spot a phishing email in 10 seconds.

01

# Read the sender's actual address.

Display names can be faked. The domain cannot.

02

# Hover before you click.

If the URL doesn't match where it claims to go — stop.

# 03

# Check the tone.

Urgency, pressure, secrecy. Real requests don't threaten deadlines.

# 10 seconds of attention

## beats hours of cleanup.
