

**An employee clicked a
bad link.**

**The next 30 minutes decide the
damage.**

01

Disconnect and report.

Offline first. Then tell IT or the owner. Speed beats embarrassment.

02

Change passwords from a clean device.

Email first — it resets everything else.

03

Check for quiet backdoors.

Login activity, forwarding rules, new devices.

**Teams that report fast
lose the least.**
